

The Community Restorer

Greetings!

AmRestore helps local non-profit with emergency contents restoration saving over 90 percent!

AmRestore of Maryland received an emergency call at 4 pm on an icy Tuesday afternoon that a local non-profit suffered a water loss that inundated three stories of structure and contents with a tremendous flow of over 90 gallons per minute! The AmRestore team immediately mobilized and was on site to meet with representatives of the restoration company they were called to assist. Through cooperation and teamwork with the restoration company, AmRestore was able to document and pack-out the contents of multiple rooms that evening. The restoration company could now work quickly to mitigate any further damage to the structure.

Due to the quick response of the insured, insurance company and the teamwork with the restoration company, AmRestore was able to save over 90% of all types and categories contents.

After being transported to **AmRestore's Personal Property Care Center**, the *vital electronics* were restored within three days of the loss with a *100 % save rate*. This all resulted in massive cost savings over replacement while drastically cutting the claims handling cost.

The Adjuster handling the claim added, "Your team did an amazing job on the contents".

We pride ourselves in the ability to restore all categories of contents with state-of-the-art equipment and techniques, but sometimes the smallest things garner the most rewarding results. It brings great joy to our team knowing we have restored the majority of the stuffed animals, children's toys and many sentimental items. We have also had amazing results with shoes making them better than pre-loss condition. Sometimes the smallest details can bring the biggest smiles!

Helping others is what makes our chosen profession so great!
